

Boardmaker® Instructional Solutions

✔ Boardmaker Expedition Education

Special Educators have had very few choices in curriculum for students with special needs... until now!

Boardmaker Expedition Education is a rigorous academic curriculum designed to transform students with special needs in 3rd grade and higher into readers, writers, and thinkers.

What Makes Boardmaker Expedition Education Different?

Rigorous Approach that Promotes Critical Thinking

Students engage with each topic from multiple angles —as readers, writers, historians, geographers, and more. Through a broad range of motivating and interactive activities, students demonstrate cross-curricular learning with writing activities, portfolio sharing, and more!

Full Year Curriculum

Each unit in Boardmaker Expedition Education encourages students to read, write and think across the following learning domains: geography, history, people, and culture. Students engage in introductory lessons that establish background knowledge, and later, culminating activities that allow for reflection and celebration.

Staff Development

Our expert curriculum designers incorporate the latest instructional best-practices into detailed lesson plans providing teachers and support staff with embedded professional development.

Not Just Aligned to Standards...

The Boardmaker Online platform allows teachers to deliver standards-aligned curriculum, record performance results, and link those to IEP goals. It's a complete educational system closely integrated with the Boardmaker software you've come to count on.

Gorgeous Artwork and Photography

Visually appealing, age-neutral illustrations and photos bring the cultures and countries to life, and help students relate the topics to their own life... this is high quality educational material specifically designed for your students.

Interactive activities engage students while learning about the world around them.

Boardmaker Expedition Education

Here's what you get in each unit

- 3 introductory lessons using an accessible textbook to provide an overview of the unit
- 16 lessons focused on geography, history, people and a unique contribution, each grounded in a book
- 2 culminating days which include celebratory and reflective activities providing tiers of support for writing activities

What else do you get?

- Vocabulary instruction in each strand focusing on academic vocabulary
- Over 25 interactive activities per unit representing best practices in education
- A foundational unit used to kick off your students' expedition
- Quick Lesson Guides for each unit that result in zero prep time
- Predictable Lesson Plans
- Literacy Skills Inventories

What's being said about Expedition Education?

"This is something we'll do every day. It's going to put a whole new spin on our writing."

- Nicole S., Special Education Teacher

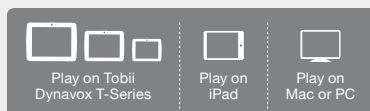

"I can't wait to start the new school year with Expedition Education! I'll be teaching the standards, my students will be engaged in their learning, and I'll have my nights and weekends free!" - Kristin T., Special Education Teacher
